Allowable Subject Matter

1. The Prior Art of record does not appear to disclose a margining circuit comprising the amplifiers and resistors as configured and operating as recited in claims 1 or 17 or the pins, divider, amplifiers and select logic configured as recited in claim 9.

Ex parte Quayle

2. This application is in condition for allowance except for the following formal matters:

Referring to Fig. 1 and claims 1-8, there appears to be some confusion with the connection order of the first and second margining nodes and the surrounding components. For example, claim 1 appears to define the circuit in "mode B" where as claim 2 appears to define the circuit in "mode A". Please review claims 1-8 to ensure consistent terminology usage through out.

Also, claims 1-8 appear to use the phrase "reference voltage" to describe the voltages at nodes VREF, OFS+ and OFS-. While these voltages are sometimes equal, they are three different voltages at three different circuit points and should have individual designations.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

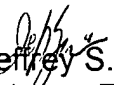

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
